👤 syed2605.github.io

Ambitious and achievement-oriented Full Stack Web Developer with a strong foundation in React, Express.js, Node.js, and MongoDB and hands-on experience of working on multiple projects. Responsible and accountable team player, excited to be at the deployment phase of career as a Web Developer.

Major Projects

Nyka Clone [↗](#) | [Github](#) [↗](#)

- An Indian e-commerce platform that specializes in beauty and wellness products
- A collaborative project completed in just five days.
- Tech Stack - HTML, CSS, Javascript.
- Features - Login, signup, filter, cart, wishlist, payment, order, Invoice and logout functionality has been developed.
- Role: I utilized my expertise in front-end development languages & developed the Products page with great attention to detail and worked diligently to ensure the page was user-friendly and aesthetically pleasing. In addition to designing the page, I also implemented various functionalities such as filters, validation and pagination.

KooApp Clone [↗](#) | [Github](#) [↗](#)

- Koo is an Indian social media platform that allows users to share their thoughts and opinions in a short and concise format, as well as share images and videos.
- A collaborative project of three people completed in just four days.
- Tech Stack - HTML, CSS, JS, React, Redux, Chakra UI, JSON Server.
- Features - Login, signup, feed, follow, follower posts, user posts, likes, creating posts and logout functionality has been developed.
- Role: I utilized above TechStacks to create the Feed page and the Create Post page, as well as to implement various functionalities such as the ability to like posts, create posts of images and videos, view one's own posts on the Profile page, view followers' posts on the Feed page, and follow popular people and to view their posts. The platform also enables users to view data of popular people and to follow them.

Mini Projects

Weather App [↗](#) | [Github](#) [↗](#)

- A web application for users who wants to check weather.
- A solo project, developed within a day.
- Tech Stack - HTML, CSS, JavaScript.
- Features: A simple weather app that get weather forecast of five days for your location & also search by a city.

Sudoku Solver [↗](#) | [Github](#) [↗](#)

- A web application for users who loves solving Sudoku.
- A solo project, developed within two days.
- Tech Stack - HTML, CSS, JavaScript
- Features: A simple algorithm-based application created for users who loves solving sudoku
