To secure a challenging position as a MERN Stack Developer, leveraging my technical expertise and passion for web development to contribute to the success of a dynamic organization. With a keen eye for detail and a problem-solving mindset, I strive to deliver high-quality code and intuitive user experiences that exceed client expectations and drive business growth.

Projects

Nyka Clone ↗ | ⌗
- *An Indian e-commerce platform that specializes in beauty and wellness products*
- A collaborative project completed in just five days.
- *Tech Stack* - HTML,CSS,Javascript.
- *Features* -Login,signup,filter,cart,wishlist,payment,order, Invoice and logout functionality has been developed.
- *Area of Responsibility* - I utilized my expertise in front-end development languages & developed the Products page with great attention to detail and worked diligently to ensure the page was user-friendly and aesthetically pleasing. In addition to designing the page, I also implemented various functionalities such as filters,validation and pagination.

KooApp Clone ↗ | ⌗
- *Koo is an Indian social media platform that allows users to share their thoughts and opinions in a short and concise format, as well as share images and videos.*
- It is a full stack project with the frontend developed collaboratively by three people in four days, while I developed the backend alone in two days.
- *Tech Stack*-HTML,CSS,JS,React,Redux,Chakra UI,Node.js, Express.js, and MongoDB.
- *Features* -Login,signup,feed,follow,followerposts,userposts, likes,creating posts and logout functionality has developed.
- *Area of Responsibility*: I utilized above TechStacks to create the Feed page and the Create Post page, as well as to implement various functionalities such as the ability to like posts, create posts of images and videos, view one's own posts on the Profile page,view followers' posts on the Feed page, and follow popularpeople and to view their posts. The platform also enables users to view data of popular people and to follow them.

Weather App ↗ | ⌗
- A web application for users who wants to check weather.
- A solo project, developed within a day.
- *Tech Stack* - HTML, CSS, JavaScript.
- *Features* - A simple weather app that get weather forecast of five days for your location & also search by a city.

Sudoku Solver ↗ | ⌗
- *A web application for users who loves solving Sudoku.*
- A solo project, developed within two days.
- *Tech Stack* - HTML, CSS, JavaScript
- *Features* - A simple algorithm-based application created for users who loves solving sudoku
